EGA Products - Designed with access in mind.

With more than 360 standard models to choose from, EGA offers 10 full ladder lines to meet your retail, warehousing and manufacturing application needs. Whether it's a dock ladder or an industrial truck ladder, every product in the EGA line is designed for optimum performance and safety at an affordable price. Whatever the application, our experts can provide the right ladder solution.

All EGA products - ladders, storage racks, carts, dollies and partitions - are made entirely in the U.S. to ensure you receive the highest quality product for years of dependable service.

Standard Features

- Choose from steel or stainless construction.
- Select from Grip Strut®, EZY tread, or Anti-Slip vinyl treads for step and platform surfaces.
- Select from a variety of step widths to fit your application.
- Steel reinforced rubber feet, foot/bumper pads and super durable casters utilized.
- Floor locking systems designed and tailored for each specific style.
- Models that ship knocked-down, factory-erect (set-up), or fold-away.
- All ladders meet or exceed OSHA/ANSI standards with Cal-OSHA ladders available.
- Ability to add double or triple top steps, and fold down tray to most models.

EZY Tread®

- Choose for standard duty or cleaner areas.
- Perforated tread design formed from a solid steel sheet.
- Eliminates sagging problems and front edge wear which are common with most expanded metal treads
- Available in steel models only.
- Self cleaning, sure footed, and economical.

Grip Strut®

- A must when oily or wet surfaces can be underfoot.
- A serrated tooth surface formed from a solid steel sheet.
- Acclaimed by all ladder manufacturers.
- Steel construction.
- Aggressive, strong, sure footed and self cleaning.

Rubber Surface Treads

- Best choice if a solid tread surface is desired.
- Soft, resilient surface that will last.
- Slip-resistant textured surface for sure footing.

Floor Locking Systems

- Spring-loaded casters retract automatically under individual's weight. Durable steel reinforced rubber tips grip floor and secure ladder when in use. Steel inserts in tips provide strength and lengthen rubber tip life (A & B).
- EZY-Lock actually is a carriage providing mobility in transport, stability when in use. Minimum of moving parts assures long service life. Four casters located on the corners of the carriage/ladder provide mobile stability to the ladder. The first ladder step disengages carriage which puts ladder firmly on floor before being used. Step on one of two convenient foot pedals and the ladder is again mobile. No other ladder has a system with these safety orientated features (C & D).

How to Select the Right Ladder for You (We Have 100's!)

1. Select platform height based on operations to be performed. Maximum convenient working height is generally 5' 0" above top platform.
2. Select as wide a ladder as space permits. Take into account whether people must pass ladder in aisle and where ladder must rest when not in use.
3. Consider limitations on ladder dimensions imposed by doorways, overhead obstructions, corners that ladder must turn, etc.
4. Consider some of our special "optional" features to insure the complete effectiveness of your EGA ladder.
5. For unusual conditions not illustrated in this brochure, we can provide custom engineering.

How to Order

1. Select the model that best fits your application and performance requirements (see Select the Right Ladder above).
2. Review accessories and options to complete the effectiveness of your EGA Ladder. Include items on order.
3. When available, specify KD (knocked-down) if desired. Models ordered without KD option will be supplied as all-welded SU set-up.

Usage Tips for Ladders

1. Proper selection
2. Inspect before each use.
3. Follow USE suggestions.
4. If assembly required, follow instructions.
5. Follow maintenance guidelines.

EXAMPLE:

WORKING HEIGHT = 160"

— MINUS 60" (5' 0")

= EQUALS PLATFORM HEIGHT = 100"

**SINCE 10" = 1 TREAD HEIGHT
NUMBER OF STEPS = 10**

General Information to all Distributors

Pricing

Prices are as indicated in this catalog and are subject to change without notice. All prices are F.O.B. our plant, Brookfield, WI or Mooresville, NC.

Terms

Terms of payments are net 30 days from date of invoice with approved credit. Any orders from any company with open invoices over 45 days old will be placed on hold until past due invoices are paid. All order and terms are subject to approval of EGA Products, Inc. A charge of 1% per month will be applied to all invoices past due. This will be calculated from the 31st day.

Routing of Shipments

Unless your order specifies a preferred routing, shipment will be made the best way (rail, commercial truck or UPS) with freight charges collect. Freight classification for each product is shown in this catalog.

Field Incurred Charges

Company policy is to provide customer satisfaction; however, we will recognize no costs incurred in the field unless authorized by us in advance and in writing.

Damaged Goods

- Before accepting goods from a transportation company, be sure each itemized article is received as per original bill of lading and our invoice. If there is any shortage or damage, have the agent of the carrier, or his representative, state in writing on the freight

bill(s) exactly what the shortage or damage is before accepting the goods.

- If discovery of loss or concealed damage is made after you have received the goods, notify the agent of the carrier within 48 hours in the case of apparent damage or loss, or within 15 days in case of concealed damage.

Cancellation Policy

- We will cancel any order within 2 days of the order without cancellation charge; beyond that, cancellation charges will be required to cover the cost incurred.
- Cancellations cannot be accepted after material has been cut to size or started in the manufacturing process.

Return Policy

- The following complete, as new, products are returnable if authorized in writing by EGA, subject to inspection at the factory to determine that the product is resalable as new.
- A restocking charge of 20% will be made and return freight will not be paid by EGA. Original freight bill from EGA to customer will not be EGA's responsibility.
- Materials which can be made resalable as new by simple additions or repainting will be salvaged at returner's expense.

Returnable Items

- Carts (Casters subject to inspection for wear).
- Partition Panels-Standard Only.
- SG1000 Standard wall panels

- SG100 Vari-panels

- Line Posts

- Corner Hardware

- Steel Roll EZY Ladders B or G tread without accessories or modifications.

- Office Ladders without modifications.

- Post Protectors.

- Cylinder Cabinets

- Custom Work Platforms (3'x3' only).

- Boxed KD products are subject to an additional 15% in restocking charges.

Discount Policy

EGA's discount schedule is applicable only in conjunction with the EGA terms just described, unless specifically written by EGA Products. Discount will be applied to distributors that:

- (1) have and meet sales volume commitments and
- (2) actively market and sell EGA Products as their primary or exclusive supplier.

Minimum Billing is \$25.00.

Dimensions and specifications contained within this catalog are subject to change without notice. Weights are approximate and may not be final shipping weight. EGA will not pay freight based on actual weight differences from application.

Industrial Rolling Ladders

Round Tube

Industrial-grade ROLL-EZY ladders are constructed of durable, welded steel and are suited to a wide variety of stockroom, warehouse, maintenance and shop floor applications. These ladders are available standard with your choice of EZY tread. Grip Strut® or Anti-Slip Vinyl surface tread. Ideal for general industrial use, stock picking, and maintenance needs.

Features

1. 450 lbs. (1 person) capacity.
2. Rigid 1" diameter steel tubular frame designed for strength and security
3. Standard widths available for most models are 16", 24" and 30".
4. Steps are 7" deep with the top step 9½" deep.
5. 3" spring-loaded casters provide portability while rubber tips hold ladder in place during use (1-7 steps standard).
6. EZY-Lock provides mobility and holds ladder in place during use (8-16 steps standard). Also standard on 6020H, 7020H plus 6 and 7 steps with deep top step.

8 to 16 steps	4" ball bearing swivel and 4" rigid on rear

Industrial Rolling Ladders

Square Tube

These ladders roll with ease, yet lock securely in place while in use. They are ideal for a wide variety of warehouse, stockroom, maintenance and shop floor applications. Rugged square tube construction is 40% stronger than round tubing and welded sub assemblies for extra strength. 450lb capacity. Rigid 1" square tubing. 2 – 4 Steps have spring-loaded 3" casters which provide mobility while rubber-tipped legs add traction while in use. 5 – 16 Steps have an Ezy-Lock that features 4" casters which are released putting ladder legs firmly on the floor when pressure is applied to bottom step. 16", 24", & 30" wide steps. Steps are 7" deep with a deeper 14" top step. Perforated or Grip Strut tread for slip-resistant footing. Meets OSHA standards.

EZY Climb

Unlike other steeper industrial warehouse ladders, the safety angle is designed with a more gradual incline for the feel and comfort of a stairway. Incorporating a deeper run, it allows workers to easily carry stock items while ascending/descending more quickly. 450 lbs capacity. Rigid 1" square tubing. 2 - 4 steps: Spring loaded 3" casters provide mobility while rubber tipped legs adds traction while in use. 5 - 10 steps: Ezy-Locks features 4" casters, which are released putting ladder legs firmly on the floor when pressure is applied to bottom step. 17", 24" & 30" wide steps available. Steps are 7" deep with a deeper 14" top step. Perforated or Grip Strut Tread for slip-resistant footing. Meets OSHA standards.

*NOTE: EZY Lock bottom step standard on 5-step ladders and above. Also, 7-step 20" wide and double- and triple-top step 6- and 7-step ladders. All ladders with chain gate options. Call for correct pricing.

360° Rotating Rolling Ladders Square Tube

EGA 360 degree rotating rolling ladders are the perfect solution for tight warehouse aisles. These ladders can spind on their own axis while still being able to track in a straight line. Unique 4 wheel, double Ezy-lock design. 2-1/2" pads on each ladder leg for secure feel in the climbing position. Rugged 1" square tube construction with comfortable 1" round tube hand rails. Available in 60 degree incline angle for a more compact foot print or ezy-angle 50 degree incline. Meets OSHA standards. Weight capacity is 450 lbs.

Multi-directional Rolling Ladders

Square Tube

EGA multi-directional rolling ladders have four swivel casters which allows precision steering - enabling easier positioning of ladder in tight areas. Double Ezy-Lock mechanism easily lifts ladder to the rolling position. Stepping on the bottom step secures ladder to floor with large 2-1/2" diameter pads on each leg. 50 degree incline safety angle on stair makes ascending/descending more comfortable and with less effort. Tough 1" square tube construction with ergonomic round tube handrails. Weight capacity is 450lbs. Meets OSHA standards

Industrial Truck Ladder

Finally, a ladder that provides secure, safer access to semi-trailers when docking bays are full or unavailable. Ideal for retail and stand alone facilities, this ladder offers the "trailer jumpers" a safer alternative. The Industrial Truck Ladder has a 55-degree angle and provides a deeper run which allows workers to ascend/descend more quickly. Rugged, 10-inch semi-pneumatic wheels enable easy transport over rough surfaces - just lift the front bumpers and go.

Features

- 450 lbs. (1 person) capacity.
- Rigid 1" diameter all welded steel tubular frame.
- 10" rear wheels roll easily over the toughest surfaces (e.g., bar grating).
- 2 1/2 " heavy duty rubber bumpers/pads on front legs holds ladder secure during use.
- Steps are 36" W x 7" D.
- Top step is 36" W x 19" D.
- Top step height of 47 1/2" allows access to standard semi-trailers.
- Grip Strut® tread provides sure footing and self cleaning on steps.
- Safety chain at both the top and bottom of ladder for added safety.

Plus

- Ladder can be moved in no time with a simple lift and go.
- All-welded construction for the toughest industrial use.
- Meets OSHA standards.
- Gray enamel finish standard.

Stockpicking Ladders

This versatile ladder can be used as a combination ladder as well as a carrying cart/stock-picker. It allows multiple items to be pulled from stock at the same time, reducing your response times. 450lb capacity. Rigid 1" square tubing. Ezy-Lock features 4" casters which are released putting ladder legs firmly on the floor when pressure is applied to bottom step. 24" wide steps. Steps are 7" deep with a deeper 21" top step. Perforated or Grip Strut tread for slip-resistant footing. Shelves are 23" x 25". Meets OSHA standards.

Fixed Dock Ladders

Built with tough, all-weld construction for years of service, Walk-Thru and Side Step ladders provide easier access to docks, platforms and mezzanines. The Walk-Thru model features a handrail extending 42" above the top rung to help guide you safely up and down. The Side Step has 4 ladder rungs at the top for easy movement up and down. Both ladders rest 6" away from mounting surface for foot clearance when climbing. 300lb capacity. Rigid 1" diameter tubing for handrails. MDS models are 19" wide rungs. MDT models are 24" wide rungs and walk-thru handrails. One-diamond Grip Strut tread for slip-resistant footing. Meets OSHA standards.

Custom Work Platforms

Our custom platforms allow you to choose the style, step type, height and configuration to perfectly fit your application. Select a single platform, or choose an extension unit which allows you to add 3' to the width of select platform styles. This unit can be at the same height, or function as a step-down area below existing platforms. Multiple options enable you to build a large surface area that surrounds machinery or spans the entire shop, factory or warehouse floor. 500lb capacity. Rigid 1-1/4" diameter tubing. 36" wide steps. Steps are 7" deep with a deeper 36" platform at top. Grip Strut tread for slip-resistant footing. Meets OSHA standards.

Industrial Stairways

OSHA Standards

Create strong, reliable access to mezzanines and elevated platforms with our Industrial Stairways. Fully assembled, all-welded construction offers more rigidity than bolt-together designs and eliminates the headaches of do-it-yourself assembly. Safely carries a 500lb moving load. Units have 10" channel stringer for strength and rigidity. 1-1/2" square tubing handrails. Stair treads are a generous 36" wide. Meets OSHA standards.

Die Shelves for Pallet Rack Beams

Designed for standard 1-5/8" step beams, EGA's Die Shelves provide a solid sheet steel deck for increased utility of existing pallet rack locations and durability. The die shelves are available with a low to high capacity of 2,000 to 6,000 pounds. Options include waterfall edges, back stop with lip up corners, colors (standard is grey enamel finish), and custom designs available.

Post Protectors

Post protectors help prevent serious personal injury and damage to rack posts, shelving corners, partitions, overhead door track bases and more. Inexpensive and easy to install, post protectors are one of the least expensive ways of reducing costs related to damaged racks.

Features

- Protects materials as well as shelves and racks.
- Sizes available for both 3" and 4" diameter columns.
- Several heights to accommodate various shelf, rack and column designs.
- Fabricated from rugged 1/4" steel plate for durability.

Plus

- Low cost way to reduce expensive damage.
- Quick, simple installation.
- The original and still the best design.
- Finished in EGA safety yellow.
- Ships UPS. Shipped from factory stock approximately 5 working days. Choose from a variety of sizes developed to accommodate virtually every shelf and rack column.

Easy to install

- Simply position Post Protectors around rack posts, shelving corners, partitioning or track base. Drill proper size holes in floor. Anchor with 1/2" fasteners (not provided).

Swing Gates

Swing gates are an easy, inexpensive solution to enclosing handrail openings. Available in two sizes which are adjustable to fit almost any opening. Gate opens a full 90 degrees. Hardware for multiple mounting options included with each gate. All models are self actuated with a heavy duty stainless steel spring. Available in yellow powder coat, hot dipped galvanized or stainless steel.

Partitions

Use EGA's mesh partitions to build enclosures without sacrificing visibility or rerouting existing air ducts, piping and lighting systems. Expanded metal mesh allows pass-through holes without unraveling. Plus, smooth expanded metal mesh won't catch clothing or cause scratches. Choose from a variety of panel, door and hardware configurations to meet your needs.

Standard Panels

Standard panel widths are 1 - 5 feet in three standard heights of 7, 8 and 10 feet. For maximum security at an affordable price, use panels 5 feet wide and 7 feet high. The large panels cost less per linear foot than any other known system and provide almost unlimited configurations for safety, security, convenience and privacy. Best of all, your crew can put them up quickly, with or without power tools.

Two types of doors

Single sliding door available in standard 3', 4', 5', and 6' widths for partitions 7', 8', and 10' high. Service window available. Single swinging door available in standard 3' and 4' widths for partitions 7', 8', and 10' high. Service window available.

Two Locking Systems

For hinged or slide gate doors. Standard is pick-proof, fully reversible multi-lock with high impact die cast aluminum case, brass cylinder, tongues and recessed knurled finger operating knob. Five pin, 1" standard cylinder secured by nut inside lock. Keys can be; door unique, keyed alike, or master keyed. Rugged padlock-type has welded hasp. Security opening accommodates various types of locks.

Industry's best shipping protection Palletized, banded, shipping unit eliminates handling damage and lost parts.

Features

- Constructed of 13-gauge expanded metal in 1 1/2" diamonds.
- Least expensive system to erect because unique fasteners permit use of power tools.
- Lower cost because corner posts are unnecessary.
- Lowest freight costs due to extremely light weight despite unusual strength.
- Palletized shipping minimizes freight damage and eliminates missing parts.
- Fully reversible: both sides of mesh are finished thanks to special perimeter design.

- No burrs: surface is brushed and blasted.
- No unraveling when pass-through cuts are made.
- EZY and true vertical alignment with adjustable floor sockets.
- Solid panel or wainscot, top or bottom, integral with panel not merely "tacked on".

Plus

- Wide range of sizes and configurations.
- Doors have mortise-type cylinder locks operated by key or optional padlock hasp.
- Changeable configurations by rearranging, adding or removing units.
- Special colors available.
- Doors keyed individually, alike or master keyed.
- Super-durable, gray enamel finish is standard.

Accessories

1. Ceiling for all enclosures provides maximum security.
2. Extension panels to increase enclosure height up to 20'. Each panel spans two bottom panels.
3. Sliding door, described at left.
4. Hinged door, described at left.
5. Slide-up service windows. Standard 3' 10" x 18" opening with optional 12' steel shelf.
6. Wainscotting. 18 gauge sheet steel, half or full panels.
7. Cutouts will not unravel thanks to our specially fabricated expanded metal.
8. Vari-panel is the most economical solution to incremental widths or non-square dimensions.

Wall Panels

How to Order

TEGA standard size wall panels in widths of 1 ft., 2 ft., 3 ft., 4 ft., and 5 ft., greatly reduce the need for special width panels. However, if required, EGA can produce special sizes for an additional charge.

1. Make a rough floor plan of the area to be enclosed.
2. Select type of partition (SG-1000, SG-2000, SG-3000).
3. Select height of partition (7', 8' and 10' standard).
4. Indicate on drawing the location and size of all doors and service windows:
 - a. show direction doors swing or slide.
 - b. show key side.
 - c. indicate whether locks are to be keyed alike, different, master keyed or padlock attachment.
5. Location of reinforcing posts (every 20' recommended for 7' and 8' high panels; every 10' for 10' high panels).
6. Color of paint if other than standard gray enamel.

Whenever possible, furnish drawings or simple sketches such as the one shown here.

8'	DSH78	\$1,230	104	DSH88	\$1,251	110	DSH108	\$1,317	132
10'	DSH710	\$1,278	122	DSH810	\$1,305	113	DSH1010	\$1,384	157

Structural Requirements

Line Post (Standard)

Required for every 20' run of 7' and 8' high partition without corners or doors. Required for every 10' run of 10' high partition without corners or doors.

Line Post (Extra Heavy)

Use for extra rigidity on walls or in heavy traffic areas.

Adjustable Corner Post

Required for corners other than 90 degrees.

Corner Hardware

CH required for each 90 degree corner in system. TH required for joining wall panels in a "T" configuration.

Ceiling or Wall Extension Panels

Provides maximum security. Odd size panel, sue larger size +\$12.

Order Instructions

- Use Model # CE HW
- Key: H=height, W=width
- Panels can be oriented either way.
- Example: CE 105 if 10' high x 5' wide
- Panel weight is 1.3 lbs./sq. ft.
- Ceiling Truss - Use when ceiling span exceeds 10 ft.

Accessories

- **Padlock Lugs** - Deduct \$19 instead of mortised tumbler lock on all doors. Specify when ordering.
- **Keyed Alike (Multiple Doors)** - No charge.
- **Master Keyed (Multiple Doors)** - Add \$48 for each locking system.
- **Service Window Unit** - 32" opeingin in 3' and wider wall panels or doors. Add \$244 to wall panel or door price.
- **Shelf** - 8" side shelf centered on window. Add \$33 to service window.

Custom Stairways

Have a need for a custom stairway system? Our engineering team can help!

EGA's greatest asset is our expert team of engineers and fabricators with decades of experience in the material handling industry. Many of the world's most prestigious manufacturing, construction, and distribution companies have come to rely on this team for custom designed, custom fabricated stairways.

EGA designers and engineers are experts at analyzing operational systems and layouts of any application to create the optimal solution.

The results are fully integrated people-access solutions that include:

- Custom design for optimal material access—enhancing time/motion efficiencies.
- Consistent quality—each built to meet or exceed required tolerances.
- Ergonomic designs—increasing worker safety and efficiency.
- Code compliant—our engineers are up-to-date on all OSHA, ANSI and IBC requirements.

Paired with world-class customer service, you can count on EGA to be your partner in creating the optimal solution for your business need.

Custom Operations Platforms

EGA Products was commissioned by a world renowned manufacturer of tantalum and electrolytic capacitors. The challenge was to develop an exceptionally durable, elevated **Operations Platform** for their chemical wash station that would withstand heavy production schedules and multiple personnel usage. The operations platform must also be ergonomically efficient while simultaneously maintaining OSHA, ANSI, and local standards for workplace safety.

Analyzing the time/motion and proprietary requirements surrounding the chemical wash operation, EGA engineers designed an elevated platform made of heavy gauge steel with welded construction. Guard railing is placed as necessary to protect workers, but careful design attention ensures that select areas adjacent to the machinery are left open and unencumbered for ease of operation.

Other features include:

- Slip-resistant grip-strut decking and stair treads
- Customized paint scheme to complement both the company's internal and external branding

EGA Operations Platforms are available with stainless steel construction or offered in a variety of finishes, including:

- Painted enamel
- Powder coat
- Hot-dipped galvanized
- And more

Typical industrial applications:

- Chemical
- Electronic
- Manufactured goods
- Metalworking

ASRS Archive Modules

EGA Products designed and manufactured these **ASRS Archive Modules** to interface with the automatic storage & retrieval system (ASRS) inside the library of one of America's leading universities, doing so cooperatively with an internationally renowned manufacturer of logistics and materials handling solutions.

The module shelves must be precisely aligned to accommodate ASRS robotics reliably, a design element that is complicated by the requirement that the shelves be adjustable within precise parameters. This is why the manufacturer turned to EGA manufacturing expertise to build the modules with precise spacing to specified tolerances.

Besides library settings, these ASRS Archive Modules can be used in a wide range of ASRS environments where irregular objects must be accommodated, including but not limited to:

- Automotive
- Food
- Manufacturing
- Metalworking
- Shipping
- Military/government

These ASRS Archive Modules feature boltless construction. They are available with stainless steel construction or come in variety of finishes, including:

- Painted enamel
- Powder coat
- Hot-dipped galvanized
- And more

Typical industrial applications:

- Automotive
- Food
- Manufactured goods
- Metalworking
- Military/government
- Shipping

Shipping & Receiving Packaging Benches

EGA Products was commissioned by a world renowned manufacturer of agricultural and construction equipment to design and manufacture customized **Shipping & Receiving Packaging Benches** for handling small tractor parts. Along with ergonomic design and exceptional durability, these benches also need to integrate a computer keyboard and hard drive that are central to the company's barcode inventory control system.

Analyzing the time/motion requirements surrounding the company's shipping & receiving operations, EGA engineers designed a packaging bench with an exceptionally durable work surface, and ergonomically placed compartments for boxes and other packaging materials.

The design integrates an adjustable swing arm that optimally positions the computer keyboard relative to the height of the operator and also includes:

- Roll stock dispensers
- Organized storage areas
- Optimally sized compartment to accommodate the hard drive and keep out of harm's way

EGA customized Shipping & Receiving Packaging Benches are available with stainless steel construction or offered in a variety of finishes, including:

- Painted enamel
- Powder coat
- Hot-dipped galvanized
- And more

Typical industrial applications:

- Automotive
- Manufactured goods
- Shipping
- Military/government

Portable Stacking Racks

Portable Stacking Racks are known for their versatility - ours are no exception. Whether it's storage, handling, or transporting, EGA Portable Stacking Racks perform where and when they are needed. Racks not in use can be broken down for convenient, compact storage freeing up floor space normally occupied by bulky, permanent rack systems. Materials can now move through your entire production process...all on the same rack.

Stacking racks give you the best of both worlds: weight load capacities rivaling wood pallets...combined with the positive stacking and product protection only plug/post joint racks can deliver. EGA has designed portable stacking racks for a variety of applications including: textiles, wire coils, automotive parts, tires, and more. Available in open frame, wood, steel, welded wire mesh or perforated steel decks.

Features

- Standard post is 1.5" square tube on 2000 lbs. capacity units and 2.17" square tube on 4000 lbs. units.
- Standard sizes change in 6" increments (custom made to any size).
- Free up valuable floor space.
- Return more empties in less space.

- Coil racks, fixed posts, interstacking with existing units, and nestable racks.

Options

- Floor skid runners for unit conveyability.
- Fork stirrups or pockets to prevent shifting of racks on fork tines.
- Custom design? Send your RFQ.

Custom Engineered Returnable Racks

Caring about workers and the environment.

When this tier 1 supplier needed a transport rack for their rear-suspension assemblies, they were precise. The racks needed to be both returnable and ergonomically designed to minimize worker fatigue. Working with the supplier, EGA designed and built custom stackable racks that allow random loading at the supplier and permit easy random unloading at the automotive assembly line. And because all painted surfaces are protected by the racks during transit, hard-to-dispose-of-packaging waste was eliminated.

Why Custom Engineered Returnable Racks?

Manufacturers have had to settle for something less than the best way to store and transport their products. They've had to use packaging, pallets and racks that left their products every which way AND loose. The results have been needless waste of space, product, labor and material dollars.

EGA provides you with the better way. Our Custom Engineered Returnable Racks incorporate the features and characteristics of your products and processes into rack design that saves you space, product, labor and money.

Using EGA's Custom Engineered Returnable Racks, you change the size, shape and location of staging and inventory areas. And by leaving material on Returnable Racks, you easily move work in-process around the plant, or between plants, to better meet scheduling or seasonal needs. Then by using a design feature that allows you to fold them when not in use, you compactly store or return empty Returnable Racks to free up floor or trailer space.

Don't settle for anything less than the best way to store and transport your product. Get the material handling solution that truly meets your needs, again and again. EGA Custom Engineered Returnable Racks.

Send your custom specifications and we will return a quote within 2-3 business days.

Bulk Containers

Visualtainers

No more looking up at racks and guessing at what's inside. Visualtainers™ let you actually see your materials inventory. Critical to today's JIT production processes, Visualtainers help you keep a high volume of parts close to the production line - accessible and easy to transport. These versatile units can be stacked six high at a rated capacity of 2,000 lbs. or 4,000 lbs. Available in both standard and custom designs to meet your special applications.

Solid-Sided

Solid-Sided dunnage containers are designed to store small items or granular materials and are available in corrugated or flat steel sides in gauges seven through 16. Standard sizes are offered in height increments of two inches; floor clearance ranges from four to 12 inches. Top flanges can be turned in or out depending on the application.

Send your custom specifications and We will return standard quotes within one business day. More complex or higher quantity quotes may take 2-3 business days.
