WM-103	36"Wx36"D	26" c/c	173	
WM-104	48"Wx48"D	30" c/c	309	

## WORKMASTER® options

### HORIZONTAL TUBE CADDY

Option HT: This horizontal caddy slides onto the side rails of the platform and stores 4' and 8' fluorescent tubes. Dual level tray keeps old and new tubes separated.

### VERTICAL TUBE CADDY

Option VT: Attaches to the side of the platform and holds a box of 4' or 8' fluorescent tubes. Conserves valuable platform space for tool or supply storage.

### OVERHEAD GUARD

Option OG: Attachable overhead guard can be used to help protect workers from falling objects. The overall height of the guard is 80" from the platform deck to the top of the guard.

### OPTIONAL CASTERS

Option SC: These easy roll 4" casters bolt directly to the bottom of tine sleeves.

### SLIDING TOOL TRAY

Option TT: This handy workshelf secures to the side rails of the platform. It keeps tools within reach without restricting platform space.

# STOCKMASTER®

This companion to the overhead work platform will aid in the selection and inventorying of stock. It too fastens to a standard lift truck and negotiates narrow aisles. Stockmaster® gets the stock handler and pallet to overhead shelves for loading and unloading and, it shares the same durable construction features as the standard work platform. The Stockmaster® is now equipped with a 6' swivel fall protection lanyard mounted overhead to an 84" tall back guard. A full body harness for personnel can be purchased separately. The 20"Dx30"W platform with a 4" toeboard gives the attendant room to stand with enough stacking space to handle 42" deep pallet.

- 84" H back guard
- 2 1/2"x5 1/2" tine sleeve
- 42" railing ht.
- 4" toeboard
- 1 1/4" steel tube railing
